

ClanChat

Founders' Sign-Up & Integration Roadmap

Companion to Spec v4.0 · Feb 2026

Confidential · clanchat.app · ClanChat Ltd (in formation)

This is the ordered checklist of every account, integration, and legal step needed to reach the full vision described in the v4.0 spec. Stages are gated — later stages depend on earlier ones. Pick items off in order and nothing gets blocked.

Priority key

Marker	Meaning
■	Blocks everything downstream — do first
■	Blocks public launch
■	Blocks monetisation
■	Blocks safety compliance
■	Operational — gradual
■	App store publishing
■	Live streaming
■	Defensive brand handles

Stage 0 — Legal Foundation (Do This Week)

Nothing that touches money should happen before this. Everything below depends on Stage 0 being complete.

#	Action	Where	Cost	Why
1	Register ClanChat Ltd	companieshouse.gov.uk	£12	Legal entity for banks, investors, IP, contracts
2	Founders' Agreement (dual-class shares)	seedlegals.com	£200–400	Locks equity, conduct clause, IP ownership before anyone leaves
3	Business bank account	Wise Business · Starling · Revolut Business	Free	Payment processors require Ltd + business bank
4	ICO registration (Data Protection fee)	ico.org.uk	£52/yr	Mandatory before you legally process UK user data
5	Trademark " ClanChat " (word mark)	ipo.gov.uk	£170	Blocks squatters. Class 9 (software) + Class 45 (social network)
6	Trademark " Your Personal Clubhouse "	ipo.gov.uk	£170	Same reasoning
7	Company email founder@clanchat.app	Google Workspace or Fastmail	~£6/mo	Needed for every account below

Stage 0 total: ~£620 + £6/mo · **Timeline:** 2–3 weeks (trademarks take ~4mo to grant but you can proceed once filed)

Stage 1 — Compliance Before Public Launch

Required before submitting to the Play Store or opening general signups.

#	Action	Where	Cost
8	IWF membership (Internet Watch Foundation)	iwf.org.uk	£990/yr (charity rates negotiable initially)
9	NCMEC CyberTipline reporting account	report.cybertip.org	Free
10	CEOP reporting endpoint	ceop.police.uk (form request)	Free
11	PhotoDNA (Microsoft) — CSAM hash matching	microsoft.com/photodna	Free
12	Draft Terms of Service · Privacy Policy · Content Policy · Cookie Policy	Seedlegals templates + solicitor review	£500–1,000

Once Stage 1 is done: the CEOP live submission pipeline (already scaffolded in `server.py`) can be wired up. That unblocks Google Play submission.

Stage 2 — Payments (Monetisation)

Do these once Ltd is formed and Companies House number is issued.

#	Provider	Signup URL	What It Unlocks	ClanChat Cut
13	Stripe	stripe.com/gb (UK Ltd account)	Cards worldwide except Russia/CN — the workhorse	10% subs / 7.5% tips + merch
14	Xsolla Publisher	publisher.xsolla.com	Gaming microtransactions + regional coverage Stripe misses	Same rates
15	ЮMoney for Business	yoomoney.ru	Russia/CIS rails	Same rates
16	Printful	printful.com	Print-on-demand merch (no inventory risk)	7.5% on top of their cost

ЮMoney caveat

ЮMoney requires **one of the following**:

1. A Russian legal entity (subsidiary or partner)
2. A Russian resident co-founder registered as an individual entrepreneur
3. A payment-partner acting as merchant of record on your behalf

Worth deciding early. Option 3 is the fastest but takes a cut of its own. If you go option 1, that's a second Companies House-equivalent registration (roughly £4,000 + Russian accountant).

Once signed up + KYC'd: ping me the API keys and I'll wire them one at a time via `integration_playbook_expert_v2`. **Suggested order: Stripe first** (covers 90% of your users), Xsolla second (gaming crossover), ЮMoney last (Russia/CIS launch).

Stage 3 — Trust & Safety

After Ltd is formed.

#	Provider	Signup URL	Purpose
17	Yoti Business	yoti.com/business	Age verification for NSFW viewers (UK/EU/AU · Online Safety Act)
18	Veriff	veriff.com	ID verification for NSFW <i>uploaders</i> (worldwide)
19	Hive Moderation	hivemoderation.com	Replace manual AI label — auto-detects AI images / videos / deepfakes

Yoti/Veriff pricing: typically £0.50–£2 per verification, invoiced monthly. Free trial credits usually available.

■

Hive: usage-based, ~\$0.001–\$0.003 per image scanned. Free tier for testing.

Stage 4 — Ops (Gradual, Low Priority)

#	Provider	Cost	Why
20	Sentry	Free tier	Backend + frontend error tracking
21	Better Stack / UptimeRobot	Free tier	Uptime pings on <code>clanchat.app</code>
22	Resend	Free tier (100/day)	Transactional email (cleaner than Supabase default)
23	Plausible or PostHog (self-hosted)	Free / self-host	Privacy-friendly analytics — never Google Analytics, clashes with brand
24	GitHub Pro	\$4/mo	Codeowners, protected branches, more Actions minutes

Stage 5 — App Stores (Phase 3)

#	Action	Where	Cost
25	Google Play Developer	play.google.com/console	\$25 one-time
26	Apple Developer Program	developer.apple.com	\$99/year (needed for iOS Capacitor build)

Both require the Ltd registration and full policy suite from Stage 1.

Stage 6 — Live Streaming (Phase 2/3)

LiveKit Cloud is already integrated for voice/video calls — I can extend it to public and tier-gated live streams without adding a new provider.

Fallback options if we need RTMP ingest (for OBS support):

- **Mux** — mux.com — pay per streaming minute
- **Cloudflare Stream** — cloudflare.com/products/stream — flat per-minute pricing (verify Russia accessibility before committing)

Bonus — Marketing / Presence Handles to Grab Now

Free. Defensive. Do today. Grab the handles before anyone else does.

Platform	Handle	Notes
X / Twitter	@ClanChatApp	Primary marketing channel
Instagram	@ClanChatApp	Visual campaigns · reels
TikTok	@ClanChatApp	Short-form growth
YouTube	youtube.com/@ClanChat	Demos + founder content
LinkedIn	ClanChat Ltd (company page)	Investor + hiring channel
Reddit	r/ClanChat (as moderator)	Community control
GitHub Org	github.com/clanchat	Already secured
Discord	ClanChat server	Community + support pre-app

Total Estimated Setup Cost (Stage 0 + 1)

Bucket	Cost
Companies House registration	£12
ICO annual fee	£52
Trademark ClanChat	£170
Trademark tagline	£170
Founders' Agreement	£200–400
Solicitor review of legal docs	£500–1,000
IWF membership (year 1)	£990 (charity waivable)
Company email (year 1)	£72
Stage 0 + 1 total	~£2,166 – £2,866

Everything from Stage 2 onward is either **usage-priced** (only pay when you take payments / verify users) or **free tier eligible** at your current scale.

Suggested First Moves (This Week)

1. **Register ClanChat Ltd** (30 min, £12) → gets the company number
2. **Grab all social handles** (30 min, free) → defensive
3. **File both trademarks** (1 hour, £340) → protects the brand
4. **Reply with the Ltd company number** → I'll update: - Terms/Privacy footer with proper legal identification - ICO registration number placeholder - "ClanChat Ltd" branding across the admin panel - Kick off the **Stripe** integration playbook (needs Ltd + UK bank)

Dependency Chart (What Blocks What)

Stage 0 (Legal Foundation)

└─ Stage 1 (Compliance)

| └─ Stage 5 (App Stores)

└─ Stage 2 (Payments – Stripe, Xsolla, IOMoney, Printful)

└─ Stage 3 (Yoti, Veriff, Hive)

└─ Stage 5 (App Stores – requires Stage 1)

└─ Stage 6 (Live Streaming – LiveKit already live)

Stage 4 (Ops) – no dependencies, do anytime

Bonus Handles – do today, free

Contact & Questions

Anything on this roadmap needs research (e.g. IOMoney partner options, Yoti pricing negotiation, Hive credit tiers), just ask. I can dig via `integration_playbook_expert_v2` for anything payment- or auth-related, and the wider founding team can pick up policy drafting once Seedlegals templates are in hand.

Phase 3 — Creator Hub

Roadmap Addendum — Creator dashboard for revenue, subscribers, shop, finance & health

The **Creator Hub** is a dedicated dashboard giving creators a single place to understand and grow their business on ClanChat. It is organised into five tabs.

1. Overview

- Monthly revenue
- New subscribers
- Tips
- Pending payouts
- Growth vs. last month

2. Subscribers

- Active memberships
- Churn
- Renewal dates
- Discounts & promos

3. Shop

- Orders
- Digital downloads
- Printful fulfilment
- Inventory status

4. Finance

- Payout history
- ClanChat fee breakdown
- Tax documents
- Export CSV / PDF

5. Creator Health

Designed to help creators sustain a healthier, more active Inner Circle. **Can be turned off for mental-health reasons.**

- Returning subscribers
- Renewal rate
- Average watch time
- Subscriber retention
- Messages from Inner Circle members

Dependencies: builds on Phase 2 monetisation (Stripe / Xsolla / , Printful). Payout, tax and fee figures require the payments provider integrations to be live.
